SUMMARY

Motivated DevOps Engineer and System Administrator with over 2 years of experience in automating and optimizing deployment processes in cloud environments. Proficient in AWS, Docker, and Kubernetes to improve application scalability and reliability. Experienced in managing Linux-based infrastructure, implementing CI/CD pipelines, and troubleshooting production environments to ensure high uptime and performance.

EXPERIENCE

IoVista

Devops And System Administrator

November 2025 – Present, Ahmedabad

- Manage Linux-based servers and core infrastructure to ensure stability and security.
- Troubleshoot complex server, SSH, and permission-related issues.
- Design and maintain CI/CD pipelines and deployment automation workflows.
- Monitor systems continuously to ensure maximum uptime and optimal performance.
- Devised system backup, restoration, and disaster recovery procedures, strengthening data protection protocols and minimizing potential service disruption risks.
- Integrated cloud-based monitoring and alerting tools to enhance infrastructure visibility, rapidly identifying and addressing performance bottlenecks and security threats.
- Configured and maintained secure network environments, applying firewall rules and access controls to safeguard infrastructure and comply with IT security requirements.

Dynamic Method Solution

DevOps Engineer

February 2025 – November 2025, Ahmedabad

- Supported infrastructure automation using AWS services like EC2, S3, ECS, and EKS, following DevOps best practices.
- Collaborated on the implementation of CI/CD pipelines to automate build and deployment processes.
- Deployed and managed containerized applications in Kubernetes clusters on AWS (EKS).

Linearloop Private Limited

DevOps Engineer

January 2024 – December 2024, Ahmedabad

- Configured and maintained AWS cloud resources for application deployment across development, staging, and production environments.
- Built and maintained CI/CD pipelines using GitHub Actions that automated build, test, and deployment processes.
- Configured Kubernetes services and ingress controllers, and implemented Horizontal Pod Autoscaling (HPA).
- Designed and implemented Prometheus monitoring infrastructure for containerized applications.
- Integrated robust security best practices by implementing SSL/TLS encryption, automating certificate renewals, and enforcing secure access controls for production web applications.

EDUCATION

DevOps Engineer Training

DevOps Techlab • Ahmedabad • 2024

Bachelor Of Arts

Gujarat University • Dhandhuka • 2021 • 6.46

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

2025

SKILLS

Operating Systems: Linux (Ubuntu, CentOS, Amazon Linux), Windows Server

Cloud Computing: AWS, DigitalOcean

Containerization: Docker, Kubernetes (EKS), Amazon ECS

CI/CD Pipelines: Jenkins, GitHub Actions

Networking & Security: VPC, Security Groups, IAM Roles, Route 53 Version Control: Git, GitHub

Monitoring & Logging: Prometheus, Grafana, AWS CloudWatch
